OBJECTIVE

Constantly seeking to engage my knowledge to learn something useful and keep challenging myself to be a better performer in accordance to the company's requirements. Good and quick learner, team player, love to learn new things, flexible with different technologies

EDUCATION

- **G H Raisoni College of Engineering and Management, Pune (2022 – 2026)**
  B.Tech (Information Technology) CGPA: 8.21 — Pune(MH), India

SKILLS SUMMARY

- **Languages**:   Python, C++, SQL, JAVA, Dart
- **Frameworks**:   Flutter, Django, Pandas, NumPy, Matplotlib
- **Tools**:   GIT, PostgreSQL, MySQL, Firebase, FlutterFlow, Postman, REST API
- **Platforms**:   Linux, Web, Windows, Android

EXPERIENCE

- **Cloudaeon**   Pune, India
  Software Engineering Intern   *June 2025 – Present*

CERTIFICATION AND AWARDS

- **Finalist – CEPHEUS Hackathon 2025**:
  Crime Reporting App selected for the final round; recognized for addressing public safety through real-time reporting.

- **Finalist – DYPDPU Hackathon 1.0**:
  Selected for the final round among 2000 participants.

- **Software Engineer Intern Certification – HackerRank**:
  Demonstrated proficiency in coding, problem-solving, and core software engineering principles.

PROJECTS

- **Real-Time Crime Reporting System**   Flutter, Node.js, Firebase, Leaflet
  GitHub
    - Built a cross-platform Flutter app enabling civilians and police to report and manage crimes in real time.
    - Implemented role-based login with Firebase Authentication and integrated Node.js REST APIs for complaint submission and status updates.
    - Developed admin and civilian dashboards and a city-wise heatmap to visualize crime trends.

- **Task Management App**   Flutter, Supabase
  GitHub
    - Developed a cross-platform task manager with secure email authentication and offline persistence.
    - Implemented task CRUD, priorities, deadlines, and smooth UI/UX for seamless usage.
    - Optimized local caching and sync for improved performance on low-end devices.

- **Hotel Booking System**   Python, Django, PostgreSQL
  GitHub
    - Designed a responsive web app for hotel room bookings with a PostgreSQL backend.
    - Built an admin panel to manage bookings and room availability in real time.
    - Improved booking workflow efficiency by 30% through automation.
